

HCUP Award for Outstanding Research Nomination Form

Please submit this form in PDF with the additional application materials specified below.

Applications will be accepted from October 17– November 23, 2022

The Agency for Healthcare Research and Quality (AHRQ) and AcademyHealth will recognize research published in peer-reviewed journals from **January 1, 2021 – June 30, 2022** that used Healthcare Cost and Utilization Project (HCUP) databases to explore and address healthcare research topics and issues. Work honored will demonstrate how HCUP data has contributed to these areas.

Eligibility and article criteria for this nomination year has been updated. Please read the following carefully.

Eligible Applicants

All nominations for the HCUP Award for Outstanding Research must have been published in hard copy format in a peer-reviewed journal between **January 1, 2021 – June 30, 2022**, and the article must have used an HCUP database in its analysis.

Authors may self-nominate or be nominated by another individual. Only one nomination per author/individual/research group will be accepted. For those nominating an individual, please notify the author. Complete information is available on the HCUP-US website: <https://www.hcup-us.ahrq.gov/news/awards.jsp>.

An AHRQ and AcademyHealth award committee will be selecting two articles to receive the Award, one for the Clinical Award and one for the Policy Award. In addition to the recognition, posters on the chosen recipients' articles will be produced on their behalf and displayed at the 2023 [AcademyHealth Annual Research Meeting \(ARM\)](#), which will be held June 25–27 in Seattle, Washington. The winners will receive complimentary registration to attend ARM where they will be able to present their research during an HCUP session.

For questions, please contact HCUPPres@us.ibm.com.

Application Materials

Nomination packages must include the following:

- A completed application form with contact information for the lead or other designated author and responses to how the article meets core criteria detailed in the nomination form
- A pdf copy of the full article that uses HCUP data in its analysis
- No additional materials will be considered as part of the application

Review Criteria

Articles will be reviewed and rated on the criteria listed on the nomination form

Application Submission and Recipient Notification

Application materials should be e-mailed to HCUPPres@us.ibm.com, with the subject line “*HCUP Award for Outstanding Research Nomination*”. Recipients will be notified by April 21, 2023.

DEADLINE FOR SUBMISSION IS NOVEMBER 23, 2022.

- Clinical Award Policy Award

Please tell us how your research team and/or research question integrates the concepts of DEIA (diversity, equity, inclusion, and accessibility). This information is optional this year, and will not be used for the review of the article.

HCUP Award for Outstanding Research *Nomination Form: Criteria*

To complete your application, please respond with 3-5 sentences for each of the questions listed below. There is no need to submit other materials.

1. Originality of the Use of HCUP data

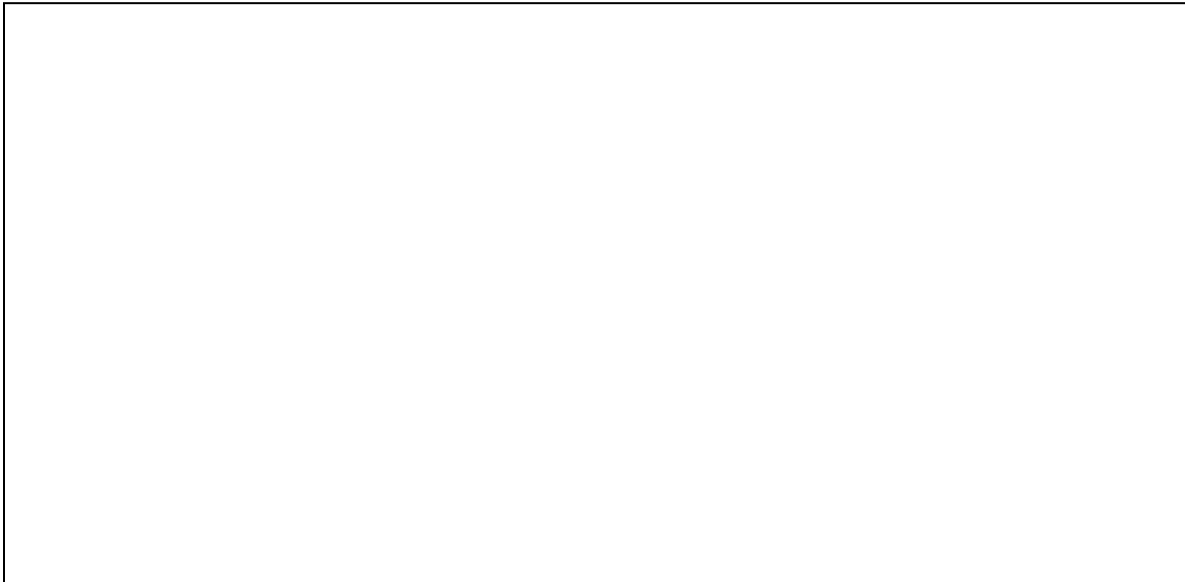

- Please describe how the article demonstrates new/interesting/timely/important research questions or innovative perspective on health, the healthcare field, public health policy, or research using HCUP databases. How does the article demonstrate improvements or advancements on established research methodology?

2. Quality and Suitability of Methods and Research Design for HCUP data:

- Please describe the rationale for chosen HCUP databases and the methods used to analyze them.

3. Policy or Clinical Relevance (*please respond in regard to the award category article is being nominated for*):

- Please describe the clinical or policy relevance of the research, depending on the category chosen above.

4. Significance, Implication, and Translation of Research:

- Please describe the direct implications of the article's findings for improvements in healthcare delivery and systems of care (i.e. accessible, safe, equitable, effective, efficient, timely, and patient-centered healthcare). Please describe how the article inspires future research or changes to practice.
